INTRODUCTION

MediSync is a multi-layered service that helps with hospital management by integrating various functionalities that help with room/patient management and provide real-time patient information to help nurses and doctors deliver optimal care.

MAIN OBJECTIVES

PATIENT
MONITORIZATION

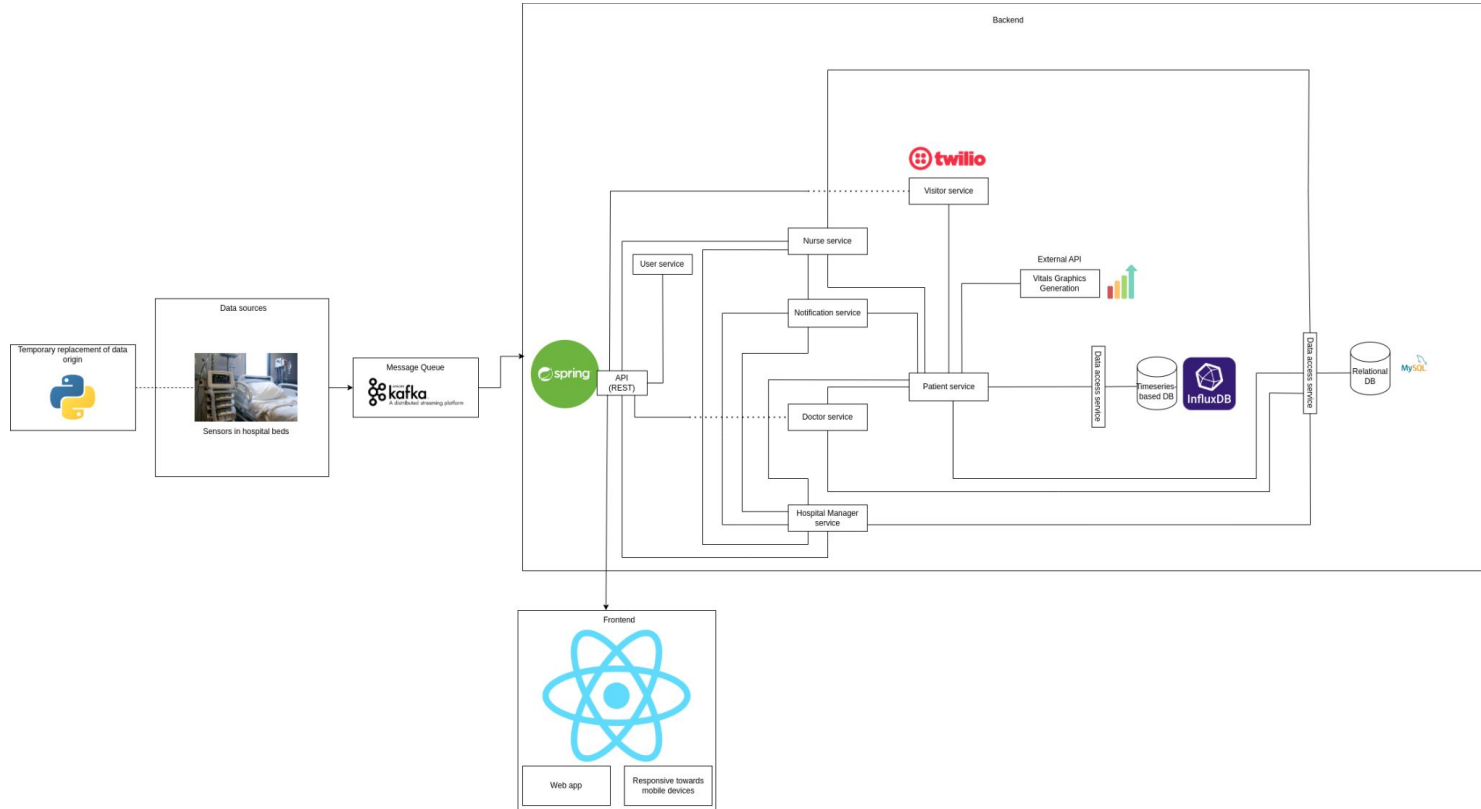

INCREASE STAFF
COORDINATION

IMPROVE HOSPITAL
ORGANIZATION

ARCHITECTURE

PERSONA – DOCTOR

- As Nadia, a doctor, I **want to** be able to access a patient's vital signs history since they arrived at their room **so that** I can have a bigger picture of how their health progressed since they arrived
- As Nadia, a doctor, I **want to** be able to add information to each patient about necessary medication that needs to be provided by the nurses at a specific time **so that** they can make sure that the treatment is made while the patients are in their rooms.

PERSONA – HOSPITAL MANAGER

- As David, a hospital manager, **I want to** be able to easily discharge a patient from the hospital **so that** I can optimize bed/room usage and help patients quickly
- As David, a hospital manager, **I want to** be able to check a map of the rooms and the respective beds, to check bed/room availability and which rooms have patients with contagious diseases **so that** I can optimize patient placement and hospital management
- As David, a hospital manager, **I want to** be able to register a patient in the system and assign a bed/room and a doctor to the patient **so that** the hospital can be more organized.
- As David, a hospital manager, **I want to** assign a group of nurses to a specific room and a specific time frame by selecting the room, the time frame and selecting their names from a list of available nurses **so that** I can ensure adequate staffing and that each room has staff assigned to it.

PERSONA – NURSE

- As Peter, a nurse, **I want to** receive an alert when a patient is discharged, **so that** I know which rooms/beds need to be prepared.
- As Peter, a nurse, **I want to** see what rooms I am assigned to **so that** I can be prepared and present in the correct locations to provide care for patients.
- As Peter, a nurse, **I want to** check my assignment schedule for the day **so that** I can know where I'll be needed next.
- As Peter, a nurse, **I want to** be able to monitor the vital signs and assigned medication of the patients in the rooms I'm assigned too in real-time **so that** I can ensure their health status is stable and respond promptly to any changes
- As Peter, a nurse, **I want to** be able to receive an alert if something unusual like a drastic change in heartbeat happens to my patient, **so that** I can help them as fast as possible.

PERSONA - VISITOR

- As Maria, a visitor, I **want to** be able to check where my relative's room is by receiving a secret code from the application sent by the reception **so that** when I enter the hospital to visit them, I know where to go.

PROJECT MANAGEMENT (BACKLOG)

The screenshot displays a Jira project backlog for 'ies-24-25-group-project-103'. The interface includes a top navigation bar with tabs for Backlog, Team capacity, Current iteration, Roadmap, My items, and a New view button. A filter bar allows searching by keyword or field. The backlog is organized into four columns: User Stories, Todo, In Progress, and Done.

User Stories (12 items, Estimate: 28):

- ies-24-25-group-project-103 #5: As David, a hospital manager, I want to be able to register a patient in the system and assign a bedroom and a doctor to the patient so that the hospital can be more organized. (P3, 2)
- ies-24-25-group-project-103 #6: As David, a hospital manager, I want to be able to easily discharge a patient from the hospital so that I can optimize bedroom usage and help patients quickly. (P3, 2)
- ies-24-25-group-project-103 #7: As David, a hospital manager, I want to assign a group of nurses to a specific room and a specific time frame by selecting the room, the time frame and selecting their names from a list of available nurses so that I can ensure adequate staffing and that each room has staff assigned to it. (P3, 2)
- ies-24-25-group-project-103 #8: As Peter, a nurse, I want to be able to monitor the vital signs and assigned medication of the patients in the rooms I'm assigned too in real-time so that I can ensure their health status is stable and respond promptly to any changes. (P3, 1)
- ies-24-25-group-project-103 #9: As Peter, a nurse, I want to check my. (P3, 1)

Todo (4/15 items, Estimate: 4):

- ies-24-25-group-project-103 #346: Patient creation modal doesn't carry over patient admission date. (P0, 1, Iteration 5)
- ies-24-25-group-project-103 #327: Fix CSS of Nurse's Calendar. (P2, 1, Iteration 5)
- ies-24-25-group-project-103 #348: Influx retention rate needs to be limited. (P3, 1, Iteration 5)
- ies-24-25-group-project-103 #294: Develop presentation. (P3, 1, Iteration 5)

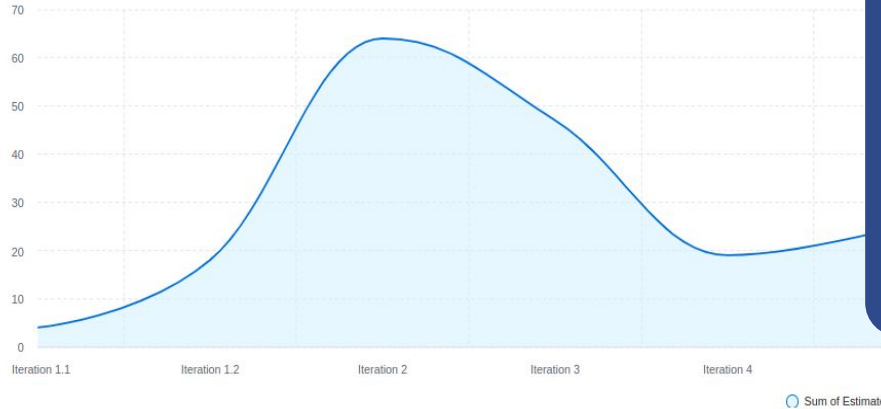

In Progress (5/5 items, Estimate: 4):

- ies-24-25-group-project-103 #328: Nurse should have a button do declare that a bed has been cleaned. (P1, 1, Iteration 5)
- ies-24-25-group-project-103 #370: Insertion script must be updated to account for contagious patients. (P1, 1, Iteration 5)
- ies-24-25-group-project-103 #334: Complete user stories. (P2, 1, Iteration 5)
- ies-24-25-group-project-103 #296: Update Documentation (report). (P3, 1, Iteration 5)
- ies-24-25-group-project-103 #371: Fix/insertion script contagious 370. (P1, 1, Iteration 5)

Done (292 items, Estimate: 208):

- ies-24-25-group-project-103 #337: Change Patient's boolean 'state' to a String 'state'. (P0, 1, Iteration 5)
- ies-24-25-group-project-103 #356: Make vitals consistent in everypage. (P0, 1, Iteration 5)
- ies-24-25-group-project-103 #358: Discharge date on Patient Details not updating. (P0, 1, Iteration 5)
- ies-24-25-group-project-103 #343: Not removing a notification once the task has been completed. (P0, 1, Iteration 5)
- ies-24-25-group-project-103 #329: Notification should be created when a patient's medication is due. (P0, 2, Iteration 5)
- ies-24-25-group-project-103 #192: Create static interface for "Hospital Manager Notifications". (P0, 1, Iteration 3)
- ies-24-25-group-project-103 #341: (P0, 1, Iteration 5)

PROJECT MANAGEMENT (BACKLOG)

Develop the static interface for 'Visitor Instructions' #182

Closed

#314

detiuaveiro/ies-24-25-group-project-103 Private

alof2004 opened on Nov 7 · edited by alof2004

Edits ...

Develop the static interface for where visitors check the instructions on how to get to a room of a patient

Important: This issue was initially for Iteration 3 but got moved to the following iteration because the assignee had a few problems developing

Iteration

Iteration 4 •
Nov 19 - Dec 2

FUTURE IMPROVEMENTS

Include monitorization

Kafka messages; user requests

Improve security

Passwords are very simple and endpoints are exposed

Patients and user specifications

Doctor specializations and automatic patient attribution

Room details

Create more rooms for specific diseases

Edit/remove schedules

Edit and remove schedules

Doctor schedules

Include schedules for doctors
